-  [Information for the public](#)

Multiple sclerosis

Multiple sclerosis **Multiple sclerosis** (MS) is a disease of the central nervous system (brain and spinal cord). The disease process is one of episodes where white matter within the brain or spinal cord becomes inflamed and then destroyed by the person's own

Appendix F: Diagnosis of multiple sclerosis

Appendix F: Diagnosis of **multiple sclerosis** The full guideline contains this information.

Rapid diagnosis

Rapid diagnosis An individual who is suspected of having **multiple sclerosis** should be referred to a specialist neurology service, and seen rapidly within an audited time. The individual should be seen again after all investigations necessary to confirm

Publication date: **TBC**

Project history

Date	Update
3 August 2012	The scope defines what aspects of care are covered by the guideline and to whom it applies. Comments that were made by stakeholders during the consultation on the scope can be seen in the scope consultation table. The Guideline Development Group (GDG) oversees the development process.
8 May 2012	The draft scope is out for consultation with stakeholders. The scope defines what aspects of care the guideline will cover and to whom it will apply. If you wish to comment, you need to do so via one of the registered stakeholder organisations listed, by the deadline shown.
31 October 2011	The first draft of the scope is currently in preparation. The scope will define what aspects of care the guideline will cover and to whom it will apply.

Key documents

 Multiple sclerosis (2014): scoping workshop, consultation and final scope	29 August 2012
 Multiple Sclerosis (2014): guideline development and consultation	03 August 2012
 Multiple sclerosis (2014): list of stakeholders and how to register	16 May 2012
 Multiple sclerosis (2014): stakeholder list	08 May 2012
 Multiple Sclerosis (update): NCC information	31 October 2011
 Multiple Sclerosis (update): The Guideline Development Process - an overview for stakeholders, the public and the NHS	31 October 2011

Tillstånd	Åtgärd	Rekommendation
Anhöriga till personer med demenssjukdom	Psykosociala stödprogram	2
Anhöriga till personer med demenssjukdom	Kombinationsprogram	3
Anhöriga till personer med demenssjukdom	Avlösning	2
Anhöriga till personer med demenssjukdom	Psykosocialt stöd på distans	6
Anhöriga till yngre personer med demenssjukdom	Specifikt anpassat stöd	3
Anhöriga till yngre personer med demenssjukdom	Individuellt anpassad avlösning	3
Beteendemässiga och psykiska symtom vid Alzheimers sjukdom	Behandling med antiepileptika (karbamazepin, valproat, topiramet)	Icke-göra
Friska personer	Mentalt och socialt stimulerande aktiviteter på fritiden för att förebygga demenssjukdom	3
Friska personer	Fysisk aktivitet för att förebygga demenssjukdom	3

Tillstånd	Åtgärd	Rekommendation
Friska personer	Testning av riskgenen ApoE4	Icke-göra
Friska personer i medelåldern	Behandling av högt blodtryck för att förebygga demenssjukdom	3
Kvinnor med måttlig till svår demenssjukdom och urininkontinens	Bäckenbottenträning	Icke-göra
Närstående till personer med demenssjukdom	Utbildningsprogram	2
Personer med agitation, aggressivitet eller vanföreställningar (hallucinationer) vid måttlig till...	Behandling med antipsykosmedel (haloperidol)	8
Personer med agitation, aggressivitet eller vanföreställningar (hallucinationer) vid måttlig till...	Behandling med antipsykosmedel (risperidon)	7
Personer med agitation, aggressivitet eller vanföreställningar (hallucinationer) vid måttlig till...	Behandling med antipsykosmedel (olanzapin)	9
Personer med Alzheimers sjukdom	Regelbunden, minst årlig, bedömning av behandlingens längd och utsättningsförsök vid behandling med...	1
Personer med Alzheimers sjukdom i särskilt boende	Kombinerad träning - individanpassad, funktionell träning med medelhög intensitet	5
Personer med Alzheimers sjukdom i särskilt boende	Individanpassade träningspromenader	7
Personer med Alzheimers sjukdom och Downs syndrom	Behandling med kolinesterashämmare	2
Personer med beteendemässiga och psykiska symtom vid Alzheimers sjukdom	Behandling med kolinesterashämmare (donepezil, galantamin, rivastagmin)	10
Personer med beteendemässiga och psykiska symtom vid Alzheimers sjukdom	Behandling med memantin	6
Personer med beteendemässiga och psykiska symtom vid demenssjukdom	Utredning och behandling av bakomliggande orsaker	1
Personer med beteendemässiga och psykiska symtom vid demenssjukdom	Behandling till natten med klometiazol	8
Personer med beteendemässiga	Behandling med antipsykosmedel	Icke-göra

Tillstånd	Åtgärd	Rekommendation
och psykiska symtom vid måttlig till svår demenssjukdom	(quetiapin)	
Personer med demenssjukdom	Tidig social utredning	1
Personer med demenssjukdom	Årlig medicinsk och social uppföljning	1
Personer med demenssjukdom	Personcentrerad omvårdnad	1
Personer med demenssjukdom	Utbildning av personal för att förebygga och upptäcka vanvård	1
Personer med demenssjukdom	Reminiscence	8
Personer med demenssjukdom	Validation	8
Personer med demenssjukdom	Multiprofessionellt teambaserat arbete inom vård och omsorg	2
Personer med demenssjukdom	Utbildning av personal i vård, omvårdnad och omsorg	6
Personer med demenssjukdom	Långsiktig personalutbildning som är kombinerad med praktisk träning, handledning och feedback	1
Personer med demenssjukdom	Handledning i kombination med utbildning till personal	3
Personer med demenssjukdom	Behandling med omega-3-fettsyror	FoU
Personer med demenssjukdom	Behandling med vitamin E eller vitamin C	FoU
Personer med demenssjukdom i livets slutskede	Palliativ vård	1
Personer med demenssjukdom i särskilt boende	Multifaktoriell intervention (flera samtidiga åtgärder) för att förebygga fall	1
Personer med demenssjukdom i särskilt boende	Kombinerad träning - individanpassad, funktionell träning med medelhög till hög intensitet	5
Personer med demenssjukdom i särskilt boende och på sjukhus	Översyn av läkemedel för att förebygga fall	1
Personer med demenssjukdom inom särskilt boende	Personligt utformade, berikade och hemlika fysiska boendemiljöer	1
Personer med demenssjukdom och aggressivitet	Beteendetekniker	10
Personer med demenssjukdom och aggressivitet	Validation	10
Personer med demenssjukdom och aggressivitet	Fysisk aktivitet	5
Personer med demenssjukdom och	Personal som kommunicerar på	2

Tillstånd	Åtgärd	Rekommendation
annan etnisk bakgrund	samma modersmål med kulturkompetens	
Personer med demenssjukdom och fysiska begränsningsåtgärder	Kontinuerliga observationer och utvärderingar	1
Personer med demenssjukdom och fysiska begränsningsåtgärder	Utbildning och handledning av personal för att minska användandet av fysiska begränsningsåtgärder	1
Personer med demenssjukdom och förstoppning	Magmassage	8
Personer med demenssjukdom och förstoppning eller risk för förstoppning	Behandling med paraffinolja	Icke-göra
Personer med demenssjukdom och förstoppning eller risk för förstoppning	Biofeedback (träning av muskelkoordination)	Icke-göra
Personer med demenssjukdom och förstoppning eller risk för förstoppning	Regelbundna toalettvanor	1
Personer med demenssjukdom och konfusion	Läkemedelsbehandling med antipsykosmedel (haloperidol, risperidon)	8
Personer med demenssjukdom och konfusion	Läkemedelsbehandling med olanzapin	Icke-göra
Personer med demenssjukdom och konfusion	Aktivering dagtid med tillägg av klometiazol nattetid	8
Personer med demenssjukdom och misstänkt konfusion	Utredning och behandling av bakomliggande orsaker	1
Personer med demenssjukdom och risk för förstoppning	Fiberrik kost och ett adekvat vätskeintag genom tillförsel av vätska	1
Personer med demenssjukdom och risk för förstoppning	Fysisk aktivitet	1
Personer med demenssjukdom och risk för nedsatt munhälsa	Strukturerad bedömning av munhälsa	1
Personer med demenssjukdom och skrikbeteende	Beteendetekniker	10
Personer med demenssjukdom och undernäring	Nutritionsintervention - energiberikning av mat och dryck, extra mellanmål, konsistensanpassning	1
Personer med demenssjukdom och undernäring	Nutritionsintervention i form av tillägg av näringsdrycker	5

Tillstånd	Åtgärd	Rekommendation
Personer med demenssjukdom och urininkontinens	Individuellt utprovade absorberande produkter	1
Personer med demenssjukdom och urininkontinens	Långvarig kateterbehandling	Icke-göra
Personer med demenssjukdom och vandringsbeteende	Fysisk aktivitet med måttlig intensitet	3
Personer med demenssjukdom och viktförlust (misstänkt undernäring)	Regelbunden bedömning av näringstillstånd (vikt, BMI och viktförlust och vikhistoria)	1
Personer med demenssjukdom på sjukhus	Multifaktoriell intervention (flera samtidiga åtgärder) för att förebygga fall	1
Personer med demenssjukdom på sjukhus och i särskilt boende	Regelbunden bedömning av fallrisk genom kartläggning av tidigare fall och kontinuerlig skattning av...	1
Personer med demenssjukdom på sjukhus och i särskilt boende	Höftskyddsbyxa	8
Personer med demenssjukdom samt undernäring eller sväljningssvårigheter i livets slutskede	Sondmatning (enteral nutrition)	10
Personer med demenssjukdom som har svårigheter att klara av dagliga aktiviteter	Deltagande i individuellt anpassade aktiviteter inklusive fysisk aktivitet	1
Personer med demenssjukdom som har svårigheter att klara det dagliga livets aktiviteter	Stöd och uppföljning av hjälpmedel	2
Personer med demenssjukdom som ska flytta	Förberedelse inför flyttning	2
Personer med demenssjukdom vid Parkinsons sjukdom	Behandling med kolinesterashämmare (donepezil)	10
Personer med demenssjukdom vid Parkinsons sjukdom	Behandling med kolinesterashämmare (rivastigmin)	7
Personer med demenssjukdom, utan brist på vitamin B12 alternativt folsyra	Behandling med vitamin B12 alternativt folsyra	Icke-göra
Personer med Downs syndrom och misstänkt Alzheimers sjukdom	Basal utredning	1
Personer med frontotemporal demenssjukdom	Behandling med kolinesterashämmare (donepezil, galantamin, rivastigmin) eller memantin	FoU

Veileder

[Neurologiske sykdommer - Veileder i rehabilitering av mennesker med progredierende neurologiske sykdommer \(PDF\)](#)

Utgiver: Statens helsetilsyn.

Målgruppe: Kommunehelsetjenesten, Spesialisthelsetjenesten, Brukerorganisasjoner, Pasienter, Utdanningsinstitusjoner.

Innholdsbeskrivelse:

Hovedmålsettingen med denne veilederen er å bidra til å sikre kvaliteten i rehabiliteringstjenestene ved progredierende nevrologiske sykdommer. Multippel sklerose, Parkinsons sykdom, post-polio og muskelsykdommene omtales spesielt. Veilederen omhandler bl.a. følgende:

- Innføring i ulike sykdommer og konsekvenser med betydning for rehabiliteringstiltak.
- Medisinske problemer og forslag til tiltak.
- Følelsesmessige og sosiale forhold knyttet til det å få en progredierende sykdom.
- Planlegging, organisering og samarbeid mellom helsetjenestenivåene.

Norsk.
