Projekttitel/aspekt	NKR forebyggelse af fald - søgning på Guidelines
Fagkonsulent / projektleder	Kasper Søndergård / Lærke M. Stoltze Kaspersen, SST
Søgespecialist	Birgitte Holm Petersen, SST
Senest opdateret	13. september 2016

Baggrund	<p>Faldulykker er den hyppigste ulykkestype blandt ældre mennesker, og udgør dermed et vigtigt folkesundhedsproblem. Faldtilfælde blandt ældre personer strækker sig fra et enkelt snublefald til svære faldproblematikker inklusiv forekomst af besvimelse og svære balanceproblemer.</p> <p>Det anslås, at ca. hver tredje hjemmeboende over 65 år falder mindst én gang om året. Antallet af fald stiger med alderen, og halvdelen af de 80+ -årige falder mindst én gang om året. Op mod halvdelen af alle fald resulterer i en form for skade, og fald er forbundet med funktionstab, angst for flere fald og øget risiko for institutionalisering og død1.</p> <p>I lyset af de alvorlige konsekvenser og hyppigheden af fald blandt ældre, er det væsentligt at afdække evidensen for tiltag, der kan forebygge fald og på baggrund heraf udarbejde anbefalinger i en national klinisk retningslinje.</p> <p>Den nationale kliniske retningslinje vil fokusere på udvalgte dele af faldforebyggelsen.</p> <p>Fokus for denne retningslinje er forebyggelse af fald, som kan finde sted i almen praksis, i kommunalt regi (plejehjem, trænings- eller genoptræningscenter) eller i borgerens eget hjem.</p> <p>Retningslinjens patientgruppe udgøres af ældre over 65 år.</p>
Søgetermer	<p>Engelske: fall, accidental fall, fall and slip, falling</p> <p>Danske:fald</p> <p>Norske:fall</p> <p>Svenske:fall</p>
Inklusions- og eksklusionskriterier	<p>Sprog: Engelsk, dansk, norsk og svensk</p> <p>År: Sidste 10 år (2006-2016)</p> <p>Population: ældre over 65 år.</p> <p>Publikationstyper: Guidelines, practice guideline, clinical guidelines, guidance, Medicinsk teknologivurdering MTV/HTA, recommendation, retningslinjer, riktlinjer</p>
