<b>Projekttitel/aspekt</b>	<b>NKR for Demens vedr. medicin – Guidelines søgning</b>
<b>Projektgruppe</b>	Anne Mette Skov Sørensen (fagkonsulent) / Casper Larsen (projektleder)
<b>Søgespecialist</b>	Kirsten Birkefoss
<b>Senest opdateret</b>	25.10.2017

<b>Baggrund</b>	I 2014 indløste ca. 20 % af personer med en demensdiagnose antipsykotisk medicin. Det er en national målsætning, at forbruget af antipsykotisk medicin hos personer med demens skal reduceres med mindst 50 % frem mod 2025, ligesom der generelt bør være fokus på kvaliteten i den medicinske behandling hos personer med demens, både i forhold til at behandlingen er tilstrækkelig, men også at unødigt og uhensigtsmæssig medicinering seponeres. Fokus for denne nationale kliniske retningslinje er opfølgning på behandling med lægemidler.
